BATHROOM COLLECTION

GARETH
ASHTON

60 years' experience. Over 3500 products.

For over 60 years, Abey Australia has been synonymous with quality and innovation, bringing the latest design and technology to Australia. With over 3500 products, their range is a result of consistent and on-going product development with a focus on offering the best in kitchen and bathroom.

Amongst their offering is the largest range of kitchen and bathroom taps and sinkware in Australia, and a handpicked selection of exclusive European brands that are made available through Abey. The exclusive selection includes kitchen and bathroom collections from high-end Italian brand Gessi, leading granite sink range from German-innovators Schock and luxury kitchen appliances from Italian brand Barazza.

Abey pride themselves in offering a range that includes products which are committed to the environment as well as one that maintains top-tier design. They are renowned amongst designers and architects for their ability to supply a complete kitchen and bathroom package to compliment all designs.

The Abey range focuses on innovative solutions, efficient technologies and practices, and outstanding design. In recent years, Abey has become the company of first-call for the best European design and innovation in the Australasian kitchen and bathroom market.

The ability to seize opportunities, an intimate knowledge of the industry and responsive leadership style have been fundamental to Abey's success.

BATHS

The Gareth Ashton Clearwater Baths have been brought together using international designers to create a stunning and elegant range of free-standing baths using the finest materials and engineering.

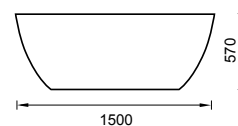

CLEARSTONE MATT

BYRON STONE BATH 26385

1500 x 800 x 570mm
67kg unfilled, 218 litres

BYRON STONE BATH 26922

1690 x 800 x 570mm
84kg unfilled, 277 litres

STONE PLUG + WASTE 26933

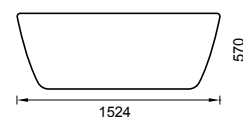

Optional

CLEARSTONE GLOSS

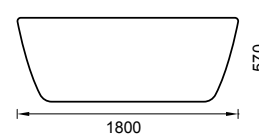

CANAL STONE BATH 22839*

1524 x 800 x 570mm
93kg unfilled, 237.5 litres
Made To Order

CANAL STONE BATH 22840

1800 x 800 x 570mm
107kg unfilled, 294.5 litres

STONE PLUG + WASTE 22529

Optional

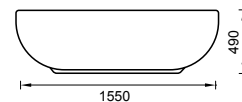

BATHS

CLEARSTONE GLOSS

TWIN STONE BATH 22838

1550 x 950 x 490mm
90kg unfilled, 342 litres
Fits two adults

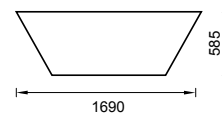

STONE PLUG + WASTE 22529

Optional

SONTUOSO STONE BATH 22436*

1690 x 700 x 585mm
71kg unfilled, 179 litres
*Order in only

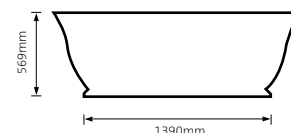

STONE PLUG + WASTE 22529

Optional

FLORENZA BATH 21123

1828 x 864 x 569mm
107kg unfilled, 230 litres

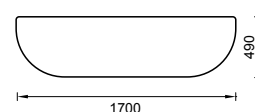

STONE PLUG + WASTE 22529

Optional

V'S CLEARSTONE NATURAL STONE

What is the difference between **ClearStone** & **Natural Stone**? Trying to pick a bath that has a thinner, delicate edge? Or love the smooth satin finish? Let's look at both of their features and find out which one you would prefer!

ClearStone

ClearStone is an advanced, new material, bonded together with milled sedimentary stone and a high-performance aluminium/titanium filler base. This unique combination allows baths to be crafted with delicate edges. ClearStone baths are a brilliant high-gloss white, with a hardwearing, scratch-resistant surface. With its exceptional performance, it is engineered to last a lifetime.

ClearStone can also be repaired in the event of minor scratches or chips.

Features

Made of a sedimentary stone composite with Gibbsite mineral filler.

Thinner edge / delicate outline

Brilliant White

Lightweight - Baths weigh less than 100kg

Retains heat for longer

No overflow

Hand Made

Lightweight - Baths weigh less than 100kg

Optional Matching Stone Plug & Waste

Baths are supplied in a carrier bag making it easy to move the bath into the right position.

Natural Stone

Natural Stone baths are made using our natural stone and mineral technology. Designed to have the solid natural stone appearance without weighing a tonne. It is hand polished for more than 10 hours to give that smooth satin finish velvety to touch. Natural Stone baths also come with an integrated overflow.

Features

Made of a composite natural stone material.

Thicker Edge – Heavier & solid appearance

Smooth Satin finish

Weighs less, compared to a true stone bath

Retains heat for longer

Comes with an integrated overflow

Hand Made

Matching Stone Waste comes with Bath

Baths are supplied in a carrier bag making it easy to move the bath into the right position.

FINISH PROCESS

GALVANIC:

The first step of the galvanic process ensures the tapware componentry is cleaned to remove all the grease, dirt and dust from the surface. This is done by a process of degreasing. Firstly, it is done by hand, then in an automatized chain at 80° C as well as 50°C and then with sodium in room temperature. This process takes 20 to 25 minutes. Second step is applying of a layer of Nickel. This allows the final layer of finishing to be completely attached to the components and it also avoids the risk of oxidation of the surface. In our finishing process we use Nickel PWP, which releases less nickel than the standard one. The result is components with better quality and the tapware treated with this process won't release any toxic substances when water flows into it. The thickness of the nickel layer has an average of 15 micron. The components are now washed again then sent to the final bath for plating. The plating process gives a hard finish surface which passes a standard salt spray test to ensure there isn't any oxidation.

POWDER COATED:

Powder coating is a finishing process in which a coating is applied electrostatically to a surface as a free-floating, dry powder before heat is used to finalise the coating. Powder coating is a finishing process that yields a thick hard finish that is tougher than conventional paint. The process of powder coating starts with the preparation of the tapware to be powder coating. Firstly, the tapware is cleaned to ensure the removal of any debris and oil which can inhibit the attachment of the dry powder. Next, the dry powder is applied electrostatically – a process by which the particles of the powder and the object are charged through a high voltage electrostatic surge. This electrostatic stage of powder coating greatly increases the efficiency and productivity of the coating process as less paint is wasted and the metal object is fully coated.

The sprayed powder coating is then cured at temperatures as high as 400 degrees for ten minutes so that the finish can set onto the object. While setting, the powder melts and flows around the object. The heat not only melts the powder but binds the polymer into a heavier polymer that bonds in a tight network-like finish. The curing not only coats the sheet metal product but it also binds the polymer into a tighter heavier finish. The benefits of the process of powder coating are numerous. Due to the dense finish on the tapware, it ensures it is more durable and longer lasting than conventional painting. Secondly powder coating is a thick one coat finish so the process is quite easy. Also, powder coating creates even surfaces.

PVD:

PVD is a coating technology used to deposit a thin film (few microns) on tapware. PVD stands for "Physical Vapor Deposition". The finishing process begins inside a vacuum chamber, where different metals like titanium, zirconium and chrome evaporate in a vacuum atmosphere. Due to kinetic energy and a potential difference, ions move on the products surface where they condense creating the desired coating. PVD coating is particularly recommended for tapware as it allows hardness and is resistance to abrasions, scratches and corrosion. Typically processed with a thin layer, PVD coating offers exceptional aesthetic features as well as guarantees a very long life for the durability.

Abey Australia offers a complete design solution with our custom kitchen and tapware collection finishes. Each of our special finishes have been developed using state of the art technology processes that result in exceptional surface quality and a unique design element.

Best of all our finishes are done as part of the production process which ensures consistency and stock being readily available in our warehouses.

FINISH PROCESS

FINISH	SUFFIX	PROCESS
Aged Brass	AB	Galvanic
Antique Copper	AC	Galvanic
Black	B	Powder Coated
Brushed Brass	BB	PVD
Brushed Nickel	BN	Stile: Galvanic Others: PVD
Chrome	C	Galvanic
Gun Metal	GM	Galvanic
